

At any time you can use our size guide to check whether the sizeless shoes will (or still) fit correctly!

The colours on the chart correspond to the blue, yellow and red coloured label on the individual shoes.

Once you have checked the appropriate size, you can easily adjust the shoes accordingly.

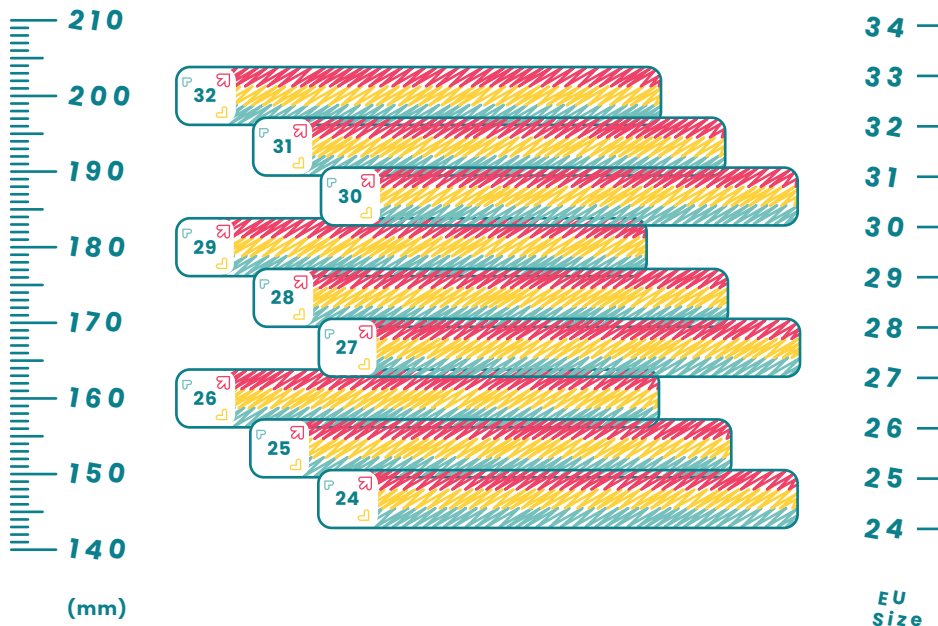

Tips for measuring kids feet:

- Measure both feet individually, often one foot is slightly bigger
- Check their foot size regularly. We recommend approximately once a month.
- You don't need to account for additional growing room. We have already built in enough space for growth.

Cut or fold along the dashed line

Then, place the new edge flush against the wall.

For the most accurate measurement your child should be standing if possible.

Check the scale carefully once printed using your own ruler.

Simply place it against the scale on the left-hand side.
